EDUCATION

San Francisco State University San Francisco, CA

B.S. Computer Science, Graduated May 2020

- **Relevant Courses:** System Administration, Analysis of Algorithms, Introduction to Database Systems, Artificial Intelligence, Linear Algebra, Software Engineering
- **Relevant Projects**
 - Created a 2D split screen tank game with power ups and breakable walls called, "Tank Wars" using Java and IntelliJ.
 - Worked in a team of 6 as a backend developer to create an online chess game with the ability to host multiple games and chat
 - Working in a team of 7 as the backend lead to create an online application to manage a fridge named, "Cloud Fridge." The application was both desktop and mobile friendly with the abilities to create shopping lists, scan images of receipts, and manage items in your fridge. Laravel was the selected framework for this project.
 - Created a NodeJS app for interacting with a MySQL database. Project was hosted on a Digital Ocean droplet. Mainly used JavaScript and HTML with handlebars and Bulma. Application allows users to create an account, log in, and then access database tables for viewing, inserting, and deleting data in the database modeled on car dealership.

College of Marin Kentfield, CA

Completed coursework towards B.S. Computer Science (May 2018)

Relevant Projects
